

GENERAL FABRICATING SERVICES

On-time, all-the-time

GFS is an experienced manufacturer (and turnkey provider) of custom skids, and modular fabrications.

When you have a custom skid project that requires fabrication and assembly (of a high quality), with an on-time delivery, (combined with competitive pricing) Let GFS be your trusted partner, and solution provider.

MODULAR SKIDS

GFS shop pre-fabrication and assembly of modular skids, provides the greatest opportunity for GFS to control quality, and reduce over-all (project) construction costs, by performing all disciplines of the required work in our controlled shop environment, instead of the typical field (or on-site) fabrication.

GFS provides in-house modular skid fabrications, including piping, structural supports, and the installation of storage tanks (if required). We also will mount all valves, process controls, and instrumentation, (including electrically wiring these components to a control panel). Our most recent project was the fabrication, assembly, and testing of (the combination of) modular pump skids, and absorption skids, (that became portable storage units).

When your modular skids, individual pipe spools, and/or valve stands, need to be built on-time, on-budget, and done right the first time, let GFS be your trusted partner and solution provider.

SUB-ASSEMBLIES

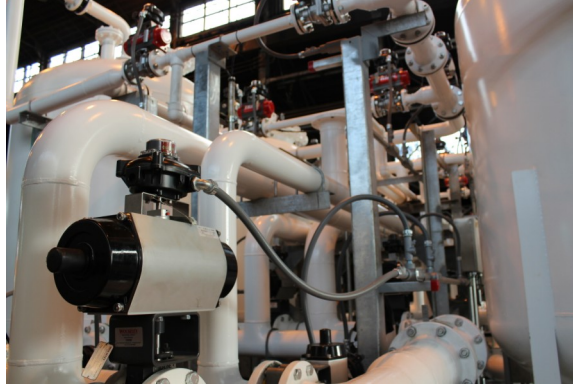

Various sub-assemblies, before, during and after testing. These sub-assemblies will get sandblasted, painted, and installed in the skid frame shown below.

When your modular skids, individual pipe spools, and/or valve stands, need to be built on-time, on-budget, and done right the first time, let GFS be your trusted partner and solution provider.

COMPONENT WIRING

Let GFS improve your bottom-line electrical costs, by having our skilled electricians wire the electrical components of the skid, to an electrical control panel.

When your modular skids, or valve stands, need to be wired on-time, on-budget, and done right the first time, let GFS be your trusted partner and solution provider.

CAPABILITIES

- LACT skids
- Loading & off loading skids
- Pig launcher & receiving skids
- Metering skids
- Storage skids
- Custom skids
- Valve stands
- Custom piping
- Custom pipe spools
- Large bore fabrications
- In-house ACAD detailing
- Custom fabrications

For modular, or custom skids, let GFS be your trusted partner, and solution provider.

DID YOU KNOW?

- GFS has available local capacity
- This available capacity is currently not dedicated to major energy companies
- GFS partners with manufacturers who need additional capacity, combined with skilled labor, and local facilities
- We provide our local facility, and in-house expertise as needed, to handle even the most demanding skid fabrication requirements
- From coast to coast, GFS has been serving the demanding needs of customers, design engineers, and manufacturing contractors for decades
- Our creative solutions, total customer support, and value-added services, have given us recent opportunities, servicing the shale-gas industry
